Angbao

Your financial workspace Inside your own agent

Start useful. No Angbao signup.

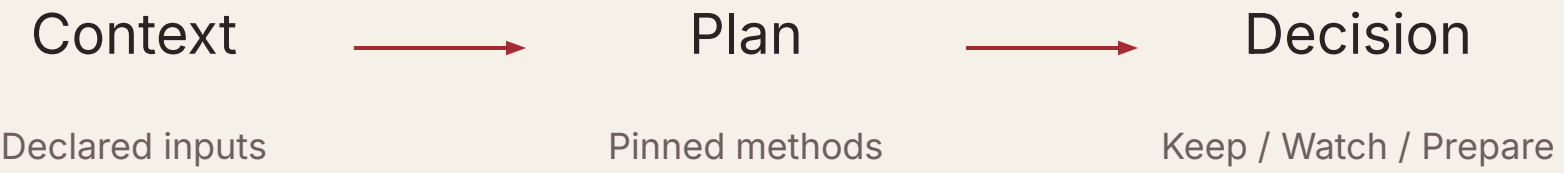

Founder House Singapore / Submission R1

Your accounts are separate

Your rules live in chats

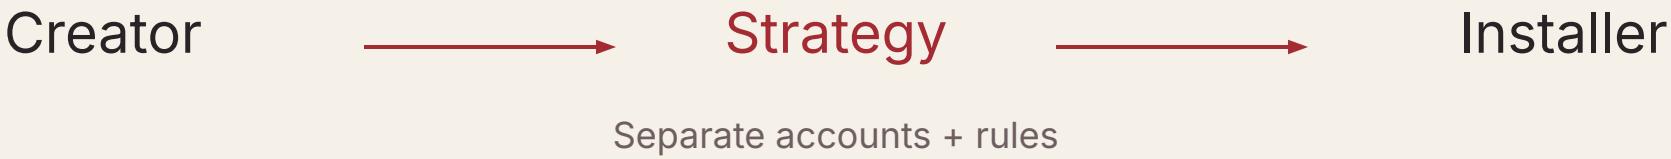

Start each review from a usable baseline.

Your financial workspace

Review. Save. Restart. Return. No signup.

Use it yourself
Share what works

Next: share methods, keep control.

Building on Robinhood Chain

Research offchain. Receipts onchain.

You review the action.
Your wallet approves.

Testnet verified · Saved through restart

First users: personal-agent users

Free local. No signup.
Paid memory + operation.

Proposed services. Pay after delivery.

Seeking 3 users
1 Offchain Labs reviewer

Prove first value.
Earn the return next week.

Ryan Teo, founder

Angbao

One line: Financial coordination for your existing agent.

Who is This For

Existing personal-agent users with one recurring financial review.

What They Do Today

Rebuild context, repeat rules and lose the earlier decision baseline.

Alternatives and Gaps

Beyond chat memory: typed reviews, exact methods and linked receipts.

The Wedge

Useful local review, saved decision and repeat use; no Angbao signup.

Why Now

Financial tools and programmable accounts expand what agents can do.

Why Onchain, Why Arbitrum

Robinhood Chain: approved actions and receipts. Private memory stays offchain.

First 5-10 Users

Five opt-in agent users with the same repeated job; then self-serve.

Ship This Weekend

Research → proposal → approved test transfer → receipt → return.

Angbao

One line: Financial coordination for your existing agent.

Who Buys, Who Uses

Individuals: free tools; paid memory and operation.

First Reachable Audience

Personal-agent users with recurring financial reviews; manual inputs suffice.

Proof You Need First

No-login first value, a second useful cycle, fulfilled paid use and renewal.

3 Distribution Channels

Opt-in trials; harness guides/maintainers; later voluntary method sharing.

Core Message, One Sentence

Give your agent a financial workspace it can pick up again.

The Intro That Helps

Three returning agent users and one wallet/application engineer.

5 Named Targets

RH Chain, Offchain Labs, ZeroDev, OpenClaw, Coinbase community; prospects.

The Ask This Weekend

Complete the review-to-receipt journey; return for a second review.
